

HIGH FREQUENCY ELECTRONICS LTD

1988 – 2008

New Zealand's largest manufacturer of Radio Frequency PVC welders.

A CELEBRATION OF 20 YEARS SUPPLYING AND SERVICING THE PVC FABRICS INDUSTRY

HFE has seen many changes within the industry in the last 20 years and has achieved many milestones. An innovative family owned business HFE pioneered the first automatic power control in 1993 which developed into a world class system. Our team of engineers and technicians designed a range of top quality RF welders which are still manufactured in our factory in Auckland. Over the past 20 years we have also designed and produced an array of custom made machinery for a variety of applications. We achieved export sales to Australia, Malaysia, India, Indonesia, Fiji, Tahiti, Vietnam, South Africa and USA. HFE provides full back up service to clients and holds a full inventory of spare parts, accessories and consumables.

Looking to purchase a new machine?

Give HFE a call first, we will listen to your requirements and find the best solution for you.
